Course information

Course prerequisites

Intermediate knowledge of public economics.

Learning objectives

Students will learn to understand key topics in public sector economics and how they are linked to economic policy issues. In addition, the course intends to advance students' development as applied economists by providing training in the knowledge transfer from scientific debate to policy solutions. While methodological concepts are important to understand the evidence on policy evaluation, they are not introduced for the sake of discussions on inference or modeling.

Course content

This is an advanced course in public sector economics whose purpose is to study the role of government in the economy. It covers basic issues in the treatment of externalities, optimal tax design, social insurance, fiscal sustainability and fiscal federalism with an emphasis on practical relevance and empirical evidence. Topics include public goods and externalities, efficiency costs and incidence of taxation, income taxation, labor supply responses to taxation, retirement policies, (re-)distribution of income, social mobility, fiscal and debt policy, budget rules, tax competition etc. The course specifically highlights and discusses Swiss evidence and experiences on these topics.

Course structure and indications of the learning and teaching design

The course will be taking place in weekly sessions in form of a lecture.

Course literature
