#### Course information

#### Course prerequisites

None.

#### Learning objectives

The students are able to identify and delineate the concept of transnational regulation as well as to understand the theoretical debate going on in that regard. They are in a position to assess the issues raised by this concept in a practical context too.

The students can explain the relationship between the diverse spheres pertaining to the concept of transnational regulation.

#### Course content

Regulation is a key concern for businesses, citizens, and governments alike. Nowadays, it is no longer the sole prerogative of the state. Virtually every area of law is enmeshed within a web of state and non-state rules either at the national, international, or transnational level. With processes of (de-)globalization and privatization of societal, mainly economic, relations, the traditional public-private divide of regulation is evolving. New rules and practices are emerging alongside transnational networks of regulators.

The course focuses on the study of the underlying theoretical concepts of multilevel regulation. It examines how state law and international law cope with transnational regulatory developments, i.e. developments that transcend the perspective of a legal order centred towards the state. The course also addresses the role of international regulatory cooperation resulting out of this situation. The presentation and discussion of chosen case studies illustrate the theoretical approach.

Topics covered include:

- an introduction to regulation and the actors' role, e.g. the state
- the concepts of national, international, and transnational regulation
- public and private regulatory regimes, e.g. private military firms
- internet governance and transnational regulation

- regulatory strategies applied to climate change
- the role and function of formal and informal regulatory networks
- the contribution and challenges of regulatory cooperation
- the rule of law and transnational regulation

The course will include individual and/or group assignments on selected issues to be discussed in class.

## Course structure and indications of the learning and teaching design

11 weekly two-hour courses in the format of lecture, topic-led discussions, group presentations or group work by students.

## Course literature

Detailed reading assignments will be provided throughout the course and will include book chapters, articles, cases, and materials.

## Additional course information

## Examination information

### Examination sub part/s

#### 1. Examination sub part (1/2)

##### Examination time and form

Decentral - Written examination (with defined exam duration) (65%, 90 mins.)

Examination time: term time

##### Remark

--

##### Examination-aid rule

Closed Book

The use of aids is prohibited as a matter of principle, with the exception of pocket calculator models of the Texas Instruments TI-30 series and, in case of non-language exams, bilingual dictionaries without any handwritten notes. Any other aids that are admissible must be explicitly listed by faculty members in the paragraph entitled "Supplementary aids" of the course and examination fact sheet; this list is exhaustive.

Procuring any aids, as well as ensuring their working order, is the exclusive responsibility of students.

##### Supplementary aids

None.

##### Nature of examination

analog

## Examination languages

Question language: English

Answer language: English

---

## 2. Examination sub part (2/2)

### Examination time and form

Decentral - Presentation (in groups - individual grades) (35%)

Examination time: term time

### Remark

--

### Examination-aid rule

Free aids provision

Basically, students are free to choose aids. Any restrictions are defined by the faculty members in charge of the examination under supplementary aids.

### Supplementary aids

None.

### Nature of examination

analog

### Examination languages

Question language: English

Answer language: English

---

## Examination content

Final written examination: lecture and course materials.

## Examination relevant literature

Reading assignments provided during the course (on Studynet until 12 May 2023).

## Please note

Please note that only this fact sheet and the examination schedule published at the time of bidding are binding and takes precedence over other information, such as information on StudyNet (Canvas), on lecturers' websites and information in lectures etc.

Any references and links to third-party content within the fact sheet are only of a supplementary, informative nature and lie outside the area of responsibility of the University of St.Gallen.

Documents and materials are only relevant for central examinations if they are available by the end of the lecture period (CW21) at the latest. In the case of centrally organised mid-term examinations, the documents and materials up to CW 12 are relevant for testing.

Binding nature of the fact sheets:

- Course information as well as examination date (organised centrally/decentrally) and form of examination: from bidding start in CW 04 (Thursday, 26 January 2023);
- Examination information (regulations on aids, examination contents, examination literature) for decentralised examinations: in CW 12 (Monday, 20 March 2023);
- Examination information (regulations on aids, examination contents, examination literature) for centrally organised mid-term examinations: in CW 12 (Monday, 20 March 2023);
- Examination information (regulations on aids, examination contents, examination literature) for centrally organised examinations: two weeks before the end of the de-registration period in CW 15 (Monday, 10 April 2023).
