Course information

Course prerequisites

Those students who plan to take this course as an optional course without an examination should also register via the bidding system.

Learning objectives

Having successfully completed this class, students will be able to:

- Understand the basics of experimental designs including general principles
- Understand what types of experiments exist
- Understand the advantages and disadvantages of experiments
- Know the characteristics and particularities of online experiments
- Apply experimental methods in their own dissertation and research projects
- Report experiments in a clear and concise way

Course content

Course Overview

This course is part of the doctoral program "Methods in Experimental Research" (MER). MER aims to build up and develop the methodological competence regarding the organization, implementation, and analysis of human behavior experiments. It is targeted to doctoral students in behavioral science, management, economics, and related disciplines who are interested in experimental methods for behavioral research.

MER is aimed at doctoral students who wish to establish causality in their research in situations where a pure correlational analysis is not sufficient. An experimental method is an advanced approach to scientific work. The program requires that doctoral students have a basic understanding of the scientific method. MER consists of two successive courses taking place in the fall and spring semesters, respectively:

- Basics in Experimental Research (fall semester)
- Workshop Series in Experimental Research Tools (spring semester)

The fall course, Basics in Experimental Research, provides doctoral students with the basic knowledge of experimental research so that they can successfully apply this method in their own dissertation. The focus is on the composition of methodological

competencies enabling students to design a thorough experimental research project in their field of interest. Through interactive seminars, self-study, and practical application, students are guided through the critical design questions of an experiment while learning to transform an initial research question into a rigorous and feasible research plan. The course also includes an overview of statistical methods for the analysis of experimental data. The main goal of the course, however, is to provide doctoral students with the ability to create an experimental design for their own research question(s) at the end of the semester. You are welcome to the fall course without taking the spring course, and you can also decide to take just one of the two courses.

Grading

After the first three meetings, students are expected to prepare a proposal for an experiment that they aim to conduct in their field of study. In Meeting 4, students will present the initial version of their experimental proposals and receive feedback. At this stage, no written work, except a PowerPoint file, is needed. Students then continue working on their proposal based on the feedback received. The final version (written report, three to five pages) is due shortly before Meeting 5. The presentation of the final proposal will take place at Meeting 5.

- Preliminary Experimental Proposal (Presentation): 40%

- Final Experimental Proposal (Report and Presentation): 60%

Course structure and indications of the learning and teaching design

Course Content, Structure, Assignments and Readings

Course Book	Webster, M., & Sell, J. (2014), Laboratory Experiments in the Social Sciences, Academic Press.
Meeting 1	<p>Introduction to Experiments as a Method of Scientific Inquiry</p> <p>Content:</p> <ol style="list-style-type: none"> 1. General introduction to the course and its objectives 2. Basic principles and designs of experiments 3. Advantages and disadvantages of experiments 4. Example of an application of an experimental method 5. Introduction to the Behavioral Lab of the University of St.Gallen <p>Objectives - After this meeting, students will be able to:</p> <ul style="list-style-type: none"> • state the expectations that they should meet at the end of the semester • discuss in what ways the experimental method differs from other methods of scientific inquiry and what contribution experiments can make to the overall research endeavor • explain the basic principles and designs of experiments • critically reflect on design choices of specific scientific experiments • understand the advantages and disadvantages of experiments • understand the services the Behavioral Lab provides to students to conduct their own experiment(s)
Mandatory Readings	<p>Webster, M., & Sell, J. (2014), Laboratory Experiments in the Social Sciences, Academic Press, chapters 1, 2, and 3 (course book).</p> <p>Stevenson, R. M., Josefy, M. A., McMullen, J. S., & Shepherd, D. A. (2020). Organizational and Management Theorizing Using Experiment-Based Entrepreneurship Research: Covered Terrain and New Frontiers. <i>Academy of Management Annals</i>.</p>
Optional Readings	Stevenson, R. M., & Josefy, M. (2019). Knocking at the Gate: The Path to Publication for Entrepreneurship Experiments through the Lens of Gatekeeping Theory. <i>Journal of Business Venturing</i> , 34(2), 242-260.

	<p>Grégoire, D. A., Binder, J. K., & Rauch, A. (2019). Navigating the Validity Tradeoffs of Entrepreneurship Research Experiments: A Systematic Review and Best-practice Suggestions. <i>Journal of Business Venturing</i>, 34(2), 284-310.</p>
Meeting 2	<p>How to Successfully Conduct Experiments</p> <p>Content:</p> <ol style="list-style-type: none">1. Types of experiments2. Do's and don'ts3. Participants and stimuli4. Tools and software5. Reporting <p>Objectives - After this meeting, students will be able to:</p> <ul style="list-style-type: none">• distinguish and conduct online, lab, and field experiments, as well as mixed approaches• avoid the common pitfalls in running experiments• deal with participants as well as use stimuli• apply tools and software to answer their research question• report their experiment in a clear and concise way
Optional Readings	<p>Bem, D. (1987). <i>Writing the empirical journal article</i>. The complete academic: A practical guide for the beginning social scientist.</p> <p>Morales, A. C., Amir, O., & Lee, L. (2017). Keeping it real in experimental research-Understanding when, where, and how to enhance realism and measure consumer behavior. <i>Journal of Consumer Research</i>, 44(2), 465-476.</p>
Meeting 3	<p>Creating online experiments</p> <p>Content:</p> <ol style="list-style-type: none">1. Characteristics and particularities of online experiments2. Recruitment of participants online3. Tools and software for online experiments (Unipark + MTurk)4. Opportunities and limitations compared to standard experiments <p>Objectives - After this meeting, students will be able to:</p> <ul style="list-style-type: none">• know about the characteristics of online experiments• know how to recruit participants and control the sample in online experiments• control whether participants cognitively reflected upon the tasks• apply Unipark to create online experiments• know how to effectively use online platforms such as MTurk for online experiments
Optional Readings	<p>Buhrmester, M, T Kwang, and SD Gosling (2011), Amazon's Mechanical Turk: A New Source of Inexpensive, Yet High-Quality, Data? <i>Perspectives on Psychological Science</i>, 6(1), 3-5.</p> <p>Dillman, DA, JD Smyth, and LM Christian (2008), <i>Internet, Mail, and Mixed-Mode Surveys: The Tailored Design Method</i>, 3rd edition, Hoboken, NY: John Wiley & Sons.</p> <p>Giorgieva, D (2012), "An introduction into A/B testing for marketing optimization," <i>HubSpot</i>. Available</p>

Additional course information

In case of administrative and content-related questions, please contact the lecturer, Prof. Dr. Charlotta Sirén, at charlotta.siren@unisg.ch.

Examination information

Examination sub part/s

1. Examination sub part (1/2)

Examination modalities

Examination type	Presentation
Responsible for organisation	decentral
Examination form	Oral examination
Examination mode	Analog
Time of examination	Term time
Examination execution	Asynchronous
Examination location	On Campus
Grading type	Individual work individual grade
Weighting	40%
Duration	--

Examination languages

Question language: English

Answer language: English

Remark

--

Examination-aid rule

Free aids provision

Basically, students are free to choose aids. Any restrictions are defined by the faculty members in charge of the examination under supplementary aids.

Supplementary aids

Practical examination

No examination-aid rule is necessary for such examination types. The rules and regulations of the University of St. Gallen apply in a subsidiary fashion.

2. Examination sub part (2/2)

Examination modalities

Examination type	Presentation
Responsible for organisation	decentral
Examination form	Oral examination
Examination mode	Analog
Time of examination	Term time
Examination execution	Asynchronous
Examination location	On Campus
Grading type	Individual work individual grade
Weighting	60%
Duration	--

Please note

Please note that only this fact sheet and the examination schedule published at the time of bidding are binding and takes precedence over other information, such as information on StudyNet (Canvas), on lecturers' websites and information in lectures etc.

Any references and links to third-party content within the fact sheet are only of a supplementary, informative nature and lie outside the area of responsibility of the University of St.Gallen.

Documents and materials are only relevant for central examinations if they are available by the end of the lecture period (CW51) at the latest. In the case of centrally organised mid-term examinations, the documents and materials up to CW 42 are relevant for testing.

Binding nature of the fact sheets:

- Course information as well as examination date (organised centrally/decentrally) and form of examination: from bidding start in CW 34 (Thursday, 24 August 2023);
- Examination information (supplementary aids, examination contents, examination literature) for decentralised examinations: in CW 42 (Monday, 16 October 2023);
- Examination information (supplementary aids, examination contents, examination literature) for centrally organised mid-term examinations: in CW 45 (Monday, 06 November 2023);
- Examination information (regulations on aids, examination contents, examination literature) for centrally organised examinations: two weeks before the end of the de-registration period in CW 45 (Monday, 06 November 2023).
