

# Regulatory Models for the Online World

Rolf H. Weber

Attorney at Law, Professor at the University of Zurich

# Content

Preface	3
Bibliography	10
<b>I. Introduction</b>	<b>25</b>
1. Myth of Independence of Cyberspace	25
2. Rise (and Fall?) of Cyberspace	26
3. Information Superhighway	30
<b>II. Law as a Structural System</b>	<b>32</b>
1. Law as a System	32
2. Relative Autonomy of Law	33
2.1 Theory of Open Systems	33
2.2 Theory of Autopoiesis	34
2.3 Criteria for Relative Autonomy	36
3. Substance of Law	37
4. Change of Law	38
5. Enforcement of Law	39
<b>III. Challenges of the Online World for Legal Systems</b>	<b>41</b>
1. Main Characteristics of Global Networks	41
2. Potential Differences between Real Space and Cyberspace	43
3. Potential Inherent Legal Limits in the Online World	45
3.1 Introduction	45
3.2 Legitimacy of Legal Norms	46
3.3 Effective Design of Legal Rules	47
3.4 Territorial Application Limits of Legal Norms	47
3.5 Enforcement of Legal Norms	49
4. Control Problems in the Online World	50
4.1 Meaning of Control	50
4.2 Players in the Online World	51
4.3 Limited Relevance of Control	52
5. Sovereignty Problems in the Online World	53

<b>IV. Models of Regulation</b>	<b>56</b>
1. No Regulation	56
2. Traditional Government Regulation	57
2.1 Justification for Government Regulation	57
2.2 Weaknesses of Government Regulation	59
2.3 Regulatory Theories	59
2.4 Outlook	60
3. International Agreements and Cooperation	61
3.1 Forms, Strengths, and Weaknesses of International Law	61
a) Introduction	61
b) International Agreements	64
c) Customary Rules	65
d) General Legal Principles	66
3.2 Nature and Functions of International Organizations	67
a) Shift of Sovereignty	67
b) World Trade Organization	70
c) World Intellectual Property Organization	72
d) ICANN	73
3.3 Outlook	75
a) Analogies to Developments in Other Market Segments?	75
b) Future Prospects	77
4. Self-Regulation	79
4.1 Introduction	79
4.2 Forms and Legal Quality of Self-Regulation	80
a) Forms of Self-Regulation	80
b) Legal Quality of Self-Regulation	81
4.3 Strengths and Weaknesses of Self-Regulation	83
a) Strengths of Self-Regulation	83
b) Weaknesses of Self-Regulation	84
4.4 Outlook: Self-Regulatory Reality in the Online World	85
5. Rulemaking through Technical Architecture	89
5.1 Lex Informatica	89
a) Conceptual Framework	89
b) Evaluation of the Concept	92
5.2 Code-Based Regulation	93
a) Lessig's Theoretical Code-Approach	93
b) Lessig's Political Code Interpretation	96
c) Evaluation of Code-Based Regulation	98
6. Concluding Remarks	100

<b>V. Rulemaking Approaches in the Online World</b>	101
1. Introduction	101
2. Market Entry	101
2.1 Domain Names	102
a) Functions and Importance of Domain Names	102
b) Origins and Privatization of the Domain Name System	103
c) Evaluation of Rulemaking Approaches	106
2.2 Open Access and Interconnection	109
a) Network Effects and Network Externalities	109
b) Importance of Access and Interconnection	111
c) Essential Facilities in Competition Law and in the Regulatory Framework	112
d) Evaluation of Rulemaking Approaches	115
2.3 Standardization	118
a) Meaning and Functions of (Technical) Standards	118
b) Problems in the Standardization Process	120
c) Evaluation of Rulemaking Approaches	122
3. Infrastructure Stability	124
3.1 Threats to Infrastructure Stability	124
a) Notion of Cyberterrorism	124
b) Denial-of-Service Attacks	125
c) Dissemination of Viruses	126
d) Other Forms of Cyberterrorism	127
3.2 Legal Frameworks and their Problems	128
3.3 Evaluation of Rulemaking Approaches	128
a) Traditional Government Regulation	129
b) International Agreements	130
c) Code-Based Regulation	131
4. Ownership and Distribution Systems	132
4.1 Intellectual Property Rights	132
a) Origins and Functions of Intellectual Property Rights	132
b) Legal Frameworks and their Problems	134
c) Enforcement Problems in the Online World	136
d) Evaluation of Rulemaking Approaches	139
aa) Traditional Government Regulation	139
bb) International Agreements	141
cc) Code-Based Regulation	142
aaa) Free Software	142
bbb) Trusted Privication	145
4.2 Privacy	148
a) Meaning and Functions of Privacy	148

# Content

aa) Aspects of Privacy	149
bb) Values of Privacy	151
cc) Goals and Scope of Privacy	153
b) Existing Legal Frameworks and their Problems	154
aa) International Level	154
bb) European Union	155
cc) United States	157
c) Evaluation of Rulemaking Approaches	160
aa) Merits of New Legal Approaches	160
aaa) Property Rights Approach	160
bbb) Procedural and Controlling Approach	162
ccc) Minimum Harmonization Approach	163
bb) Traditional Government Regulation	164
cc) International Agreements	165
dd) Self-Regulation	167
ee) Code-Based Regulation	169
d) Annex: Cryptography Regulation	170
4.3 Misuse of Distribution Channels	172
a) Spamming	173
aa) Notion and Importance	173
bb) Rulemaking Approaches	174
b) Fraudulent Conduct	176
aa) Notion and Importance	176
bb) Rulemaking Approaches	177
5. Content	179
5.1 Forms of Illegal Content	179
a) Introduction	179
b) Obscenity and Pornography	180
c) Defamation	181
d) Racism and Hate	183
e) Discriminatory Harassment	184
f) Overly Aggressive Business Practices	185
g) Potentially Undesired Content	185
5.2 Legal Frameworks and their Problems	187
a) Constitutional Background	187
b) Limits of Common Understanding	190
5.3. Evaluation of Rulemaking Approaches	191
a) Traditional Government Regulation	191
aa) Social Undesirability	191
bb) Political Undesirability	194
b) International Agreements	194
c) Self-Regulation	195

aa) Practical Approaches	195
bb) Realization Difficulties	199
cc) Possible Improvements	201
d) Code-Based Regulation	202
<b>VI. Concluding Observations</b>	<b>204</b>
